FIREPLACES™

TRULY TIMELESS

Outdoor
Fireplace Design Collection

FEATURED Oracle with Red Split Herringbone firebrick.
See page 8 for more details.

Outdoor Fireplace Design Collection

When you enter your favorite room, you are transformed. You become inspired and relaxed all at once. Enchanted and completely at home. Every carefully placed detail is a reflection of your style - a reflection of your story.

We understand. The remarkable craftsmanship found within the Astria fireplace collection is of the utmost importance to us - because we know it means everything to you. We understand that form and function should only exist in harmony. And that the little things are just as important as the big things.

So, whether you're looking for the missing piece or a fresh start, may the perfect finishing touch find you here.

Let your style shine.

Grand Meridian with Warm Red liner and 24" Southern Comfort log set.

SOUTHERN COMFORT LOGS

Vented Gas Logs demonstrate heating efficiencies comparable to most heater rated direct vent fireplaces. Our vented logs commonly generate overall heating efficiencies of 56% in a conventional masonry wood burning fireplace, contributing about 50% more to the total system heat output than typical refractory concrete gas logs. Our patented technology is a clear departure from any other vented gas log produced over the past 50 years. The log stack is integrated into the burner as a single arrangement which produces an intense red glow in the ceramic log material; not only providing uncanny wood burning realism, but also impressive levels of radiant heat. This unique system is the easiest system to install. The ceramic burner eliminates sooting normally experienced with vented log sets.

AVAILABLE SIZES: 24", 30" AND 36"

WHICH ASTRIA MODEL IS RIGHT FOR YOU?

Astria offers a broad line of vented & vent-free gas logs featuring a variety of styles and sizes.

Just follow the easy steps below to choose a great looking set of Astria gas logs.

1. Installation Considerations

Astria “Vented” Gas Logs install in any properly certified and vented masonry fireplace or manufactured firebox. “Vent-Free” Gas Logs can be installed in any certified vented fireplace or any ANSI Z21.11 certified vent-free universal firebox including the Astria Fireboxes. All burner systems with variable manual controls including remote ready are also listed to the ANSI Z21.60 Vented Log Decorative Standard which requires the GA6080 damper clamp accessory.

2. Control Choices

Astria Gas Logs are available in five control types: Manual, Thermostatic, Variable, Millivolt & Electronic Ignition. All offer easy, reliable and economical heating. Several models use a “matchless” piezo ignition system, and all other Astria Vent-Free models use an “Auto-Light” ignition, a battery-powered continuous spark system that lights the log’s burner faster.

• Manually Controlled Models

Manual control allows you to select the heat setting and flame height you desire by simply turning a control knob to enjoy flames and glowing coals from both burners.

• Thermostatically Controlled Models

Thermostat control gradually modulates the heat output and flame height from high to lower settings, or pilot, in order to maintain a consistent room temperature. Even at the lowest setting you enjoy glowing coals and realistic flames from two burners.

• Variable Remote Controlled Models

Variable remote control offers three modes of operation: manual, thermostatic, or smart mode. In smart mode, the system electronically duplicates a hydraulic thermostatically controlled valve by increasing the input rate/flame height based on the difference in room temperature and the set temperature. These systems allow 6 flame height settings from low to high while in either the manual or thermostatic modes settings.

• Millivolt Controlled Models

Millivolt controlled models operate with the manual variable controls or your choice of four remotes.

1. The Wall Mount On/Off Switch will enable you to turn your log set from pilot to on at the flip of a switch.
2. With a Wall Mount Thermostat Switch set the wall thermostat at the comfort level you desire and the log heater will automatically cycle from pilot to the heat setting selected.
3. The On/Off Remote Control enables you to turn the log heater off or on using the hand-held control. A child safety lock feature is included for additional safety assurance.
4. The Thermostat Remote Control allows you to view the time and room temperature or operate the log heater in a manually or automatically (thermostat) controlled mode plus you can turn it off or on without ever leaving the comfort of your easy chair!
Note, the log heater will always operate at the heat setting (and flame height) selected unless it is manually changed. A child safety lock feature is included for additional safety assurance.

• Electronic Ignition Models

The electronic ignition valve systems offer two modes of operation: manual or thermostatic. These systems allow 3 flame height/input settings: low, medium, or high. The pilot lights each time the system is set or calls for heat. This means that the pilot never burns when the main burners are off. When compared to other valve systems, the cost of fuel to continually operate the pilot is avoided and therefore saves the homeowner money by reducing their fuel usage.

3. Options

Most models include Flex Lines to simplify installation. Our three premium burners (Blaze n’ Glow, Tri-Flame & Magniflame) have two things in common – heavy duty wood-burning grate and realistic ember bed. Burners are designed with very distinctive features in mind:

• Blaze n’ Glow

Unique to industry. Performs same as radiant heater, fiber reaches temperature in excess of 2000 degrees.

• Tri-Flame

Additional burner behind rear log for unique depth of flame.

• MagniFlame

High flame with 19” logs. Unique burner cantilevered at 45° angle.

4. Size Choices

Astria Gas Logs are available in 18”, 24”, 30” & 36” sizes.

5. Fireplace Hoods (if required)

A fireplace hood accessory may be required to deflect heat away from your mantel shelf. Fits fireplace openings from 28” to 48” wide. Installs easily with glass doors or to the lintel of the fireplace opening.

6. Decorative Ash Bed/Control Cover Accessory Kit (optional)

This new accessory is not only functional but beautiful as well! The set includes five log pieces featuring realistic bark, split and charred areas plus a matching control cover. Simply move the cover when you need to use the control(s).

6. Warranty

Astria Gas Logs are available with a variety of styles and options. All models include the Astria 3 year limited warranty.

SAFETY FEATURES

1. Astria’s Vent-Free Gas Log Heaters are designed certified by PFS Corp. and meet or exceed all regulations and safety performance standards.
2. The dual purpose safety pilot system protects against oxygen depletion and any interruption in the fuel supply. This feature ensures clean and reliable heat without the worry and inconvenience of vented gas logs or burning wood.
3. Astria Vent-Free Gas Products Meet or Exceed Nationally Recognized Standards/Guidelines for Indoor Air Quality.

IMPORTANT – PLEASE READ

Read Owner’s Manual before using. Installation must be done by qualified service persons. Check local codes and ordinances for permitted uses. Vent-free gas products are prohibited for bedroom and bathroom installation in Massachusetts. All products approved for manufactured (mobile) home installation. We reserve the right to amend product specifications without notice.

Operating heater at very high elevations could cause nuisance outages. Use with adequate air (ventilation) only. Humidifies while it heats. Provides water vapor in the area heated (Refer to owner’s manual). Product cannot be converted between fuel types.
